**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 1 is objected to because of the following informalities: "its" in line 2 should be changed to what it refers. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Lammers et al. [US 6,478,453].

Regarding claim 1, Lammers et al. discloses a LED spotlight [2] including a lampshell [1], a light-collecting cover [14] with an aperture to engage a LED [3] and a convex being formed in the aperture, and the light-collecting cover being a paraboloid shape to reflect and to emit light in a same direction (figure 2A, 2B, 3A), column 4 lines 27-61).

Regarding claim 2, Lammers et al. discloses a connecting ring [circular edge holding a middle part of 14 and 15] being provided in the lampshell [1] (figure 2A).

Regarding claim 3, Lammers et al. discloses a cap [71] for holding the top of the cover (figure 2A).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lammers et al. in view of Pelton et al. [US 5,651,609].

Regarding claim 4, Lammers et al. discloses fins [11] on the lampshell [1] (figure 1) for releasing heat, but does not disclose the several vents.

Pelton et al. teaches the use of vents [13a] on a housing [13] for providing convection cooling (abstract, figure 1).

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the lampshell of Lammers et al. with the vents for providing convection cooling as taught by Pelton et al. for purpose of providing an advantageous way of releasing heat.

***Conclusion***

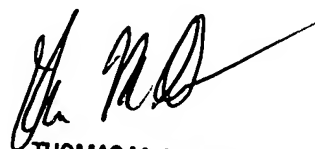

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Marshall et al. [US 6,547,423] and Balestriero et al. [US 6,561,690] disclose a LED and a collimating optic lens.
